

Deploy the mission-critical application in
seconds and make it globally resistant

SUBOTA 25.04. 9:45-15:00

About speaker

Vladimir Stefanovic

Cloud Solution Architect
@SuperAdmins

Microsoft Azure MVP, MCT Regional
Lead, Azure Architect

Azure Serbia User Group Lead

wladinho31

Microsoft
CERTIFIED
Trainer

Agenda

- Demo
- ... and a few slides prior demo ...

What is essential for resistant applications?

- Reliable hosting platform
 - *VMs, VMSS, App Service, Containers, Serverless...*
- Robust database layer
 - *SQL Server, Azure SQL, MySQL, CosmosDB...*
- Load balancing
 - *Azure Load Balancer, Application Gateway, 3rd party network appliances...*
- Global load balancing
 - *Traffic Manager, Azure Front Door, 3rd party network appliances...*
- Security

How to design globally resistant applications?
